## NOTES

Document paper type selected under L<sup>A</sup>T<sub>E</sub>X: letterpaper

Depends only on the base article.cls — no other external packages are loaded.

Depends only on the base article.cls — no other external packages are required.  
The main text font is Times Roman, the math font is Computer Modern.

The main text font is Times Roman, the math font is Computer Modern. Imperial (0.1in) and metric (mm) rulers are provided to measure centering.

The frame on this page should be centered on the paper and 1 in (25.4 mm) from the edges.

The frame on this page should be centered on the paper and 1in (25mm) wide.  
To maintain accurate dimensions, do not scale page when printing.

To maintain accurate dimensions, do not scale page when printing (File > Print... > "Scale to fit" = "1 inch (or less)" option).

(i.e., deselect any “fit to page” or “shrink/expand page” options.)

## PALLADIO FONT HINTING TEST

This is in bold **Balatino/Balladio**

## LIGATURE TEST

**Ligatures** — The office was affected by the five flawed mufflers

**Ligatures** — The office was affected by the five flawed mufflers.  
**No Ligatures** — The office was affected by the five flawed mufflers.

## MATH TESTS

## Large Delimiter and Operator Test

$$I = \begin{bmatrix} 1 & 0 \\ 0 & 1 \end{bmatrix} \quad \text{and} \quad \left( \sum_{i=0}^2 2^i = 7 \right)$$

## Minus Sign Test

If  $a = 4$ , then:  $2^{-a+7} - 2^{a-3} = 2^3 - 2^1 = 6$

## Problem Character Times Roman and Font Kerning Tests

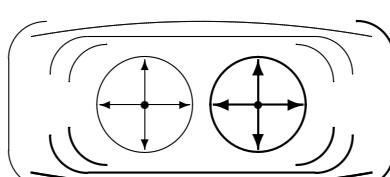

Math italic glyphs:  $\Gamma$   $\Psi$   $\Omega$   $\approx$   $\psi$   $\sim$

Large Times Roman italic: 7 GS kerning test: The “Problematic” little quotes

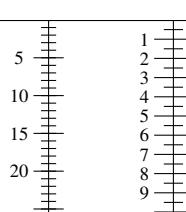

**Note:** The math italic glyphs are in the control character positions 0, 9, 10, 13, 32 and 127.

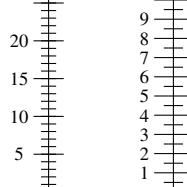

Note: The math italic gyps are in the control character positions 6, 9, 10, 13, 32 and 127, i.e. \Gamma, \beta, \Omega, \gamma, \psi and the \t{xx} tie-after accent, respectively.
